PROFESSIONAL SUMMARY

Result-oriented professional with 2+ years of experience in ASP.NET Core, Angular, C#, and SQL Server, specializing in web application development and optimization. Proficient in RESTful APIs, JWT authentication, and Azure cloud services, ensuring secure, scalable, and high-performance applications. Expertise in Agile/Scrum methodologies, delivering user stories with 95% on-time completion and optimizing development workflows for deployments.

EXPERIENCE

Associate II / Software Developer: Capgemini   **Jun 2024 – Present**

- Streamlined automated build and deployment processes across development, staging, and production environments, reducing manual deployment efforts by 60%
- Developed RESTful Web APIs and executed JWT authentication, leading to a more secure and structured access management system with reduced security incidents
- Designed and built modular components in Angular, incorporating routing and reactive forms, reducing front-end bugs by 30% in new modules
- Tuned SQL queries and improved API integration for better efficiency, reducing backend response time by approximately 25–30%

Associate I: Capgemini   **Oct 2022 – Jun 2024**

- Developed web applications using ASP.NET, ADO.NET, SQL Server, and C#, supporting aircraft maintenance workflows
- Implemented form authentication, user controls, and state management techniques, improving application security and reducing form-level bugs by approximately 15–20%
- Enhanced UI interactivity using HTML, CSS, JavaScript, jQuery, and AJAX toolkit, contributing to a smoother user experience with a 20% reduction in support tickets related to UI responsiveness
- Optimized backend logic with stored procedures and CTEs, reducing query execution time by approximately 25% in maintenance tracking modules
- Engaged in Agile/Scrum setup, participating in sprints and completing user stories with a 95% on-time delivery rate

SKILLS

Angular 12	C#	Entity Framework Core	Azure App Services
HTML5/CSS3	ASP.NET	Git/GitHub	Azure Blob Storage
JavaScript	ASP.NET Core	Jenkins	Cloud Computing
TypeScript	ASP.NET MVC	Postman	Agile/Scrum
Bootstrap	RESTful APIs	Visual Studio Code	OOPS Concepts
jQuery	SQL Server	Putty	MS Excel

PROJECTS

Airbus A220 Tech Data – Aircraft Maintenance System   **Jan 2023 – Present**

- Engineered APIs and modular components, enhancing core application functionality, integrating authentication and analytics features for improved performance
- Enhanced Entity Framework Core queries and database indexing, decreasing data retrieval time by 35% and improving overall query execution process

Event Logistics & Scheduling Console Application   **Oct 2022 – Dec 2022**

- Built RESTful APIs for event management, automating workflows and decreasing manual scheduling efforts by 60%, while enhancing system reliability with .NET Core backend
- Integrated Azure cloud services, enabling 99.9% uptime, secure deployments, and automated CI/CD pipelines, reducing release time

EDUCATION

Khammam Institute of Technology and Sciences   **Jun 2018 – Jul 2022**

Bachelor of Technology in Computer Science & Engineering

CERTIFICATIONS

- Full Stack Developer by Edureka Internship and .NET 8, ASP.NET Core, Azure AI Fundamentals by Capgemini
- .NET Core Certification by Udemy and Artificial Intelligence - Real-Time Project from Unschool
- Microsoft Certified: Azure AI Fundamental
